

Inspection Report

Ken Howery
1 Letterman Drive Bldg. D Suite #500
San Francisco, CA 94129

Customer ID: **333179**
Certificate: **93-C-1096**
Site: 002
Ken Howery

Type: ROUTINE INSPECTION
Date: 13-APR-2016

3.127(d)

FACILITIES, OUTDOOR.

The premises includes a stairway that would be easily accessible to the animal, in the event that it were to escape its primary enclosure. Once at the top of the stairs, there is the potential that the animal could leap over a railing and the perimeter fence.

Two gaps under the perimeter fence measuring up to three inches were observed. The openings could potentially be enlarged by digging in the dirt.

The perimeter fence should prevent people and animals from passing under or through the fence. People or animals entering the premises could harm the exhibit animal, or introduce disease. Additionally, the perimeter fence should act as secondary containment for the exhibit animal, in the event that it escapes from its primary enclosure, in order to protect it from harm.

Steps should be taken to prevent access to the stairwell, and to close any gaps under the perimeter fence.

This was a new site inspection. No animals were present.

An exit interview was conducted with the licensee's representative.

Additional Inspectors

Schnell Michael, Veterinary Medical Officer

Prepared By: PAMELA SMITH, D V M USDA, APHIS, Animal Care

Date:
