

Inspection Report

Petting Zoo 2 U, L L C
513 North Pueblo Boulevard
Henderson, NV 89015

Customer ID: **33477**
Certificate: **88-C-0210**
Site: 001
PETTING ZOO 2 U, L L C

Type: ROUTINE INSPECTION
Date: 13-SEP-2016

3.56(a)(1)

SANITATION.

Rabbit enclosure: In the right side, lower cage, there was a build up of hair and mixed excreta and urine waste in one front, corner of this cage. Also, there was a dirty wooden board on the cage floor which was heavily stained from excreta and urine waste.

Primary enclosures shall be kept reasonably free of excreta, hair, cobwebs and other debris by periodic cleaning. The cleaning schedule for this enclosure is inadequate, as evidenced by the build up present. Additionally, enclosures with raw wood that cannot be properly sanitized must be replaced as needed. A system of timely cleaning and sanitation must be in place to ensure the health and well-being of the animals.

Correct by 09/23/2016.

3.125(a)

FACILITIES, GENERAL.

Pig enclosure: There was an approximate 12 inch X 7 inch gap/opening with protruding wires along a bottom portion of the chain link fencing. Openings and loose, pointed wire ends of fencing may potentially cause the animals to be injured or trapped. Also, openings of this size may potentially permit other animals entrance into this enclosure.

Goat pen: A large, plywood platform on the ground in this pen was heavily worn with jagged, edges, at least two protruding nail heads, and a broken piece of a board creating a sharp, pointed and protruding end. Sharp, protruding points or edges in areas of contact with the animals may lead to injury.

All enclosures must be kept in good repair and free of sharp points, protruding edges, openings or other hazards in order to protect the animals from injury and properly contain the animals. A system of timely identification, facility repair and maintenance must be in place.
