Certificate: **22-C-0137**
Site: 001
Collins Days

Type: ROUTINE INSPECTION
Date: 24-MAY-2023

2.40(a)(1)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The licensee was unable to provide a written program of veterinary care at the time of the inspection. An electronic version of the program of veterinary care (PVC) was sent to the veterinarian that is being used by the licensee, for their convenience.

A written program of veterinary care is necessary to indicate that the care for both the health and well-being of all covered species is provided. Each exhibitor shall have an attending veterinarian who shall provide adequate veterinary care to its animals in compliance with this section.

Each exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premise of the exhibitor.

TO BE CORRECTED BY: JUNE 24, 2023

2.75(a)(1)(v)

Repeat

Records: Dealers and exhibitors.

2.75 (b)(1)(v)- Records: Dealers and exhibitors

Records of acquisition did not include the births of 9 cavies or 1 lamb. The records of disposition did not indicate the sale

Inspection Report

of 4 sheep and 1 zebu. Exhibitors shall make, keep, and maintain records or forms which fully and correctly disclose the date of sale or disposal of animals.

Records of acquisition and disposition are necessary to ensure that animals have been appropriately obtained or disposed of.

3.125(a)

Facilities, general.

The shelter for the zebu is composed of wood. The two side walls have holes of various sizes present. The rear wall has a large hole present. The front wall of this shelter has been detached from its support post. An interior plank of wood, along the rear of the shelter, has been chewed. All of these damaged areas leave this shelter in disrepair and not structurally sound. This shelter should be repaired to maintain the structural strength and to protect the animals from injury.

Outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury.

TO BE CORRECTED BY: JUNE 24, 2023

3.131(a)

Sanitation.

The following enclosures need cleaning:

1. Zebu shelter building has a significant accumulation of feces covering the entire floor. Part of this accumulation has caused the rear wall to protrude outward thus affecting the structural strength of the wall. (see 3.125 a)

Inspection Report

2. The cavy enclosure adjacent to the feed bar has a significant accumulation of feces and soil that is about 6 inches deep throughout the enclosure.

3. The sheep stall had an accumulation of feces and soil.

The excreta in the zebu shelter, sheep stall, and cavy enclosure shall be removed to prevent such accumulations. Excreta shall be removed as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors.

TO BE CORRECTED BY: JUNE 21, 2023

This inspection and exit briefing were conducted with the licensee.
