THE CREATURE CONSERVANCY

Type: ROUTINE INSPECTION

Date: 20-FEB-2024

2.131(c)(1)

Handling of animals.

The single turkey does not have a public barriers.

During public exhibition, any animal must be handled so there is minimal risk of harm to the animal and to the public, with sufficient distance and/or barriers between the animal and the general viewing public so as to assure the safety of animals and the public.

Public barriers must be put in place to protect the animals and the public from injury.

To be corrected by March 8, 2024

3.127(d)

Facilities, outdoor.

The primary enclosure housing a single arctic fox does not have a six foot perimeter fence surrounding the primary enclosure.

All outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. Fences less than 6 feet high for wild or exotic animals must be approved in writing by the Administrator. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. It must be of sufficient distance from the outside of the primary enclosure to prevent physical contact between animals inside the enclosure and animals or persons outside the perimeter fence. Such fences less than 3 feet in distance from the primary enclosure must be approved in writing by the Administrator.

A perimeter fence must be put in place no less that six foot in height and no less than three feet from the primary enclosure, or a perimeter fence variance may be requested.

To be corrected by March 25, 2024

This inspection and exit interview were conducted with a facility representative.
