Certificate: **43-A-5667**  
Site: 002

EDWARD WILLIAMS & JACLYN WILLIAMS

Type: ROUTINE INSPECTION  
Date: 15-OCT-2014

### 2.75(a)(1)(6)

#### RECORDS: DEALERS AND EXHIBITORS.

In the Record of Acquisition of Dogs and Cats on hand, there are 18 dogs that do not have the microchip listed. Complete and accurate information for the animals is important to know the animals with certainty to facilitate record keeping requirements for inventory, disposition, transport, and healthcare documentation. The owner must include the microchip numbers of all dogs in the records.

### 3.1(c)(3)

#### HOUSING FACILITIES, GENERAL.

##### (3) Cleaning.

\*\*\*\*There were 6 plastic shelters in 3 enclosures that had a large amount of mud and dirt over at least one-half of the outer surface. Cleaning of hard surfaces is essential for a healthy environment and reduces disease hazards by eliminating harboring places for diseases and pests. The owner needs to remove the dirt and mud from these areas and assure that all hard surfaces are cleaned and sanitized as required at all times.

### 3.9(b)

#### FEEDING.

\*\*\*\*There were at least 5 self feeders in the outdoor enclosures that had dirt, cobwebs, dead insects and other debris along the top inside surface, especially just under the lid. Dirt and insect debris can contaminate the food and decrease the nutritional value. The owner must ensure that feeders are kept clean and must be sanitized in accordance with Sec. 3.11(b) of this subpart to prevent the contamination and deterioration of the feed.

An exit interview was done with facility representatives.
