3.6(a)(2)(x) REPEAT

PRIMARY ENCLOSURES.

In one enclosure, containing one adult dog and three puppies, the flooring is constructed of wire. The puppies are lying on the wire flooring and two puppies were observed to have their hind feet and legs passing through the flooring. Openings in the flooring that are large enough to allow an animal's leg to pass through can cause injury to the animal.

Primary enclosures must have floors that are constructed in a manner that protects the dogs' feet and legs from injury and do not allow the dogs' feet to pass through openings in the floor. The licensee must replace the flooring or alter it in a manner that does not allow the puppy's feet or legs to pass through. The licensee must ensure that the enclosure flooring is safe for the dogs at all times. The licensee moved the puppies into a whelping box during the inspection.
