Certificate: **48-A-1027**
Site: 001
Joyce Cairns

Type: ROUTINE INSPECTION
Date: 14-APR-2021

2.40(b)(3) Direct

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

****Male, adult Pekinese with chip OAO2226111 ("Booker") has an uneven appearance to the surface of his eyes (corneas) with an area of white obscuring part of the left cornea and dark pigment on the right cornea. Both eyes have a red color to the "white of the eye" (sclera). Both eyes have mild amounts of green colored discharge dried in the hair around the eyes.**

****Male, adult Shih Tzu with chip 107 292 875 ("Buddy") has an uneven appearance to the surface of his right eye (cornea). There is dark pigment as well as a general cloudiness on the cornea. There is copious amounts of dark colored discharge in the eye and dried in the hairs around the eye.**

****The licensee is cleaning these dogs' eyes and applying artificial tears ointment but has not consulted with the attending veterinarian regarding the condition of the eyes.**

****Adult, male Akita with chip number OAO2262114 ("Dusty") has a stiff, uneven gait. The licensee moved this dog to an indoor enclosure from his usual outdoor enclosure due to intolerance to the cold weather. The licensee stated that the dog appeared to be painful and vocalized when the weather was cold. During the inspection, the dog appeared reluctant to walk and the gait appeared to be abnormal while in the indoor enclosure. The attending veterinarian verified that he is aware of this dog's body condition and coat/skin condition. However, the licensee observed that this dog was showing**

Inspection Report

signs of pain or possible orthopedic problems but has not communicated that to the attending veterinarian.

Failure to observe medical problems and/or communicate those problems to a veterinarian can result in prolonged pain or even death. The facility representative must observe all animals daily and then ensure a mechanism of direct and frequent communication with a veterinarian so that timely and accurate information on problems of health, behavior, and well-being are conveyed and so that the medical conditions of the animals can be evaluated by the veterinarian. To be corrected by close of business on 16 April 2021.

This inspection and exit interview were conducted with facility representatives.
