Type: ROUTINE INSPECTION  
Date: 05-APR-2023

---

### 3.13(a)

#### **Veterinary care for dogs.**

There was no written plan of veterinary care for dogs signed by the veterinarian available at time of inspection on April 5, 2023. The licensee was given more than 48 hours to provide documentation as required and requested but it was not received.

A written program of veterinary care for dogs signed by the attending veterinarian is important because it documents that the dog(s) are going to be provided adequate care, not limited to, but including an annual complete physical examination from head to tail of each dog exhibited, annual vaccinations for contagious and/or deadly diseases of dogs, parasite testing and treatments, and other recommended care.

Each dealer, exhibitor, and research facility must follow an appropriate program of veterinary care for dogs that is developed, documented in writing, and signed by the attending veterinarian. Dealers, exhibitors, and research facilities must keep and maintain the written program and make it available for APHIS inspection.

## Inspection Report

---

### 3.13(b)

#### Veterinary care for dogs.

There were no medical records or copies of medical records for "Rope" made available at time of inspection on April 5, 2023. The licensee was given more than 48 hours to provide copies as required and requested but they were not received.

Medical records document that dogs are being medically cared for and are receiving all the preventive care and treatments required by the animal welfare regulations.

Dealers, exhibitors, and research facilities must keep copies of medical records for dogs and make the records available for APHIS inspection. These records must include, but are not limited to, the identity of the animal and identifying marks, dated examination findings including diagnosis, procedures performed, test results, the names of all vaccines and treatments administered and dates of administration.

Correct by May 1, 2023

This inspection and exit interview were conducted with facility representatives.
