PARK MANAGEMENT  
CORPORATION

Type: ROUTINE INSPECTION

Date: 16-MAR-2023

---

### 3.106(b)(3)

#### Water quality.

In review of the water quality records, weekly coliform testing was not recorded between 12/20-12/29 and 1/30-2/8. In each of these cases the water samples were not taken and tested weekly for coliform counts as required by the regulation. During the first period, the facility was notified at the last minute of a holiday closure of the laboratory, and did not have alternative means to complete the required weekly water quality testing. Marine mammal facilities must take and test water samples weekly for coliforms and maintain the records for review during inspection.

Correct for all future inspections.

### 3.110(b)

#### Veterinary care.

On February 8th, 2023 Pip the Harbor Seal was restrained for medical procedures and moved into back holding after not eating for 3+ days. On that day, the medical note includes "releasing back into exhibit is not an option at this time due to high coliforms at Seal Cove." Pip continued to receive medical care and was still in back holding at the time of inspection, five weeks later. The holding enclosure includes a water tank that has a depth of 2 feet, which does not meet space standards under 3.104, which requires a minimum of 3 feet of water depth.

## Inspection Report

---

The Attending Veterinarian (AV) documented medical treatment on an almost daily basis initially and tapering off as Pip improved. The AV did not justify in writing on a weekly basis the extension of medical holding not meeting space requirements beyond two weeks as required in the Animal Welfare Regulations. On 12 March 2023, the medical note indicates "If able, recheck blood. If improves, consider d/c cefpodoxime and as she is working well outside of the house, consider letting Pip out on exhibit." Starting on the 22nd of February, then on the 1st, 8th, and 15th of March continued medical holding not meeting space standards should have been noted in the animals record with justification by the AV.

Correct from this day forward.

This inspection and exit interview were conducted with animal care staff.

Additional Inspectors:

William Campbell, VETERINARY MEDICAL OFFICER
