ZOO

Type: ROUTINE INSPECTION
Date: 27-FEB-2023

3.56(a)(1)

Sanitation.

Two hutches, housing intact male rabbits, have a build-up of a reddish hard pasty material on the back exterior framework and one back leg of each hutch. Primary enclosures should be kept reasonably free of debris by periodic cleaning. Accumulated material on the enclosures must be removed on a more frequent basis to minimize disease hazards and to facilitate proper sanitization. Correct by March 11, 2023

This inspection and exit interview were conducted with the licensees.
