

## Inspection Report

---

DEW Haven  
918 Pond Road  
Mount Vernon, ME 04352

Customer ID: **322927**  
Certificate: **11-C-0017**  
Site: 001  
DEW Haven

Type: ROUTINE INSPECTION  
Date: 04-APR-2023

---

### 3.125(c)

#### Facilities, general.

The meat freezer temperature gauge was not working, the door and door seal were dirty, and the cooling unit had a large icicle built up and resting upon bags of frozen parts of carcasses, which appeared to be partially frozen together due to a buildup of drips from the cooling unit. Food must be stored under sanitary conditions and at appropriate temperatures or the food may deteriorate, become contaminated, or mold. The facility must ensure that the food is stored appropriately.

Correct by end of day 04/11/2023.

### 3.125(d)

#### Facilities, general.

The wolf enclosure had an accumulation of discarded pelts, bones and hair from prey along the fenceline and rock climbing structures. Timely removal of wasted food items is necessary to ensure that animals are not exposed to disease hazards. The facility must ensure that waste materials are disposed of promptly in a manner that does not attract vermin.

Correct by end of day 4/5/2023.

### 3.127(d)

#### Facilities, outdoor.

Received by Title: Facility Representative

Date:  
05-APR-2023

## Inspection Report

---

Two tall trees have fallen over the fence to cross it in an x formation, reducing the height to less than 8 ft. Perimeter fences function to restrict animals and unauthorized persons from entering the facility and serve as a secondary containment system for the animals in the facility. The facility must ensure that the perimeter fence is kept in good repair.

Correct by end of day 4/5/2023.

This inspection and exit interview were conducted with facility representatives.
