Type: ROUTINE INSPECTION

Date: 27-AUG-2024

---

### 3.158(a)(1)

#### Cleaning, sanitization, housekeeping, and pest control.

The Indian runner duck enclosure had an accumulation of old food and feces on the ground substrate. The floor of the dry enclosure is covered in artificial turf. The front portion of the turf closest to their accessible pool of water was covered in old food waste and old fecal material. The old and accumulated waste had also attracted gnats, which were seen crawling over and flying around this waste. A facility representative stated that the turf is occasionally taken off the enclosure floor and cleaned; however, they did not know the last time this occurred. Old food and feces can lead to the contamination of the animals, may cause illness in the animals or create odors, and could attract pests which could cause stress and/or lead to the spread of disease. Excreta and food waste must be removed from the primary enclosures and from under and around primary enclosures as often as necessary to prevent excessive accumulation of feces and food waste. Correct by September 3, 2024.

This inspection and exit interview were conducted with a facility representative.
