FRISCO, TX 75033

Customer ID: **14297**

Certificate: **74-R-0230**

Site: 001

FABGENNIX INTERNATIONAL,
INC

Type: ROUTINE INSPECTION

Date: 21-SEP-2021

2.40(b)(3)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

2.40 b 3 Attending veterinarian

Several of the rabbits had varying degrees of hair loss. The facility felt the hair loss was due to barbering, however all rabbits are housed individually. Hair loss can be the result of multiple things. Barbering, lice, mites, and boredom are some causes of hair loss. The facility had not consulted with the attending veterinarian.

A method of direct and frequent communication with the attending veterinarian is required so that timely and accurate information on problems of animals' health, behavior, and well-being is conveyed to the attending veterinarian.

The attending veterinarian needs to be consulted about the hair loss in the rabbits.

To be corrected by Sept 31, 2021

3.50(a)

Facilities, general.

A majority of the rabbit cages had some degree of rust on the wire. Rust cannot be adequately cleaned and disinfected which can lead to illness and foot infections in the rabbits.

The facility needs to remove the rust from the cages or acquire new cages.

To be corrected by: Nov 1, 2021

Inspection Report

3.56(a)(1)

Sanitation.

The rabbit cages do not appear to be adequately cleaned on a routine basis. Several of the rabbit cages had an accumulation of obvious feces and hair. Other cages had a coating on the bottom wire that appeared to be a congealed mix of feces and hair.

Inadequate cleaning of cages can contribute to illness and foot infections in the rabbits, and flies and other pests in the barn.

The facility needs to ensure the rabbit cages are thoroughly cleaned on a regular basis.

To be corrected by: Oct 1, 2021

3.56(c)

Sanitation.

One of the wash pans underneath some of the rabbit cages had an excessive accumulation of congealed hair and feces.

Inadequate cleaning can contribute to illness in the rabbits, and flies and other pests in the barn. Premises shall be kept clean and in good repair in order to protect the animals from injury and illness.

To be corrected by: Sept 31, 2021

This inspection and exit interview were conducted with facility representatives.
