Site: 001
TROY & JODY GRANT

Type: ROUTINE INSPECTION
Date: 28-MAY-2021

3.131(d)

Sanitation.

* Bird droppings were observed accumulating on top of five sheltered housing units. The affected areas are located in the outdoor barn housing six skunks, three ground hogs and one ferret. The facility has no current effective pest prevention program in place. No means to control or eliminate the birds were viewed during the inspection. Lack of an effective program that controls birds can create unsanitary conditions and lead to potential health risks. Bird feces may contain pathogens that could adversely impact animal health. The licensee must have a safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained. Correct by 7/11/21

This inspection and exit interview done on 5/28/21 were conducted with the licensee.
