Site: 003  
LISA SELL

Type: ROUTINE INSPECTION  
Date: 05-SEP-2024

---

### 3.131(c) Repeat

#### Sanitation.

Housekeeping. There are rolls chain-link fencing, wire mesh, metal siding, fence posts, gate, lumber, old wooden siding, and an exposed electric wire on the ground in the upper enclosure housing 5 goats, 3 sheep, and 2 fallow deer. Items left on the ground could injure the animals in this enclosure. Buildings and grounds must be kept clean and in good repair to protect the animals from injury. Licensee must maintain enclosures in good repair by removing rolls of chain-link fencing, wire mesh, metal siding, fence posts, gate, lumber, old wooden siding, and expose electric wire from the enclosure housing the goats, sheep, and fallow deer.

### 3.150(e)

#### Facilities, general.

Storage. There are open bags of food on the floor in the bird room. Open food and storing feed on the floor can cause molding and contamination of the feed. Supplies of food and bedding must be stored off the floor and away from walls to allow cleaning around and underneath supplies. Open food must be stored in a manner that prevents deterioration spoilage, or contamination such as in a container with a lid. Correct by September 15, 2024.

This inspection and exit interview were conducted with the licensee.
