3.9(a)

FEEDING.

At least 3 self feeders and a bulk food container contained insects in the feed. There were 1/2 inch long worm like insects and 1/4 inch beetle like insects crawling thru the food in the feeders and bulk container. Insects contaminating the food can cause an illness or injury to the dogs. All animals must be fed a food that is insect free. The dog food containers must be cleaned more often. The dog food must be uncontaminated, wholesome, and palatable.

To be corrected by: June 15, 2019.

This inspection and exit interview were conducted with a facility representative.
