MARTIN HAMMEN, BARBARA HAMMEN

Type: ROUTINE INSPECTION

Date: 05-NOV-2014

2.40(b)(2)

REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A white, approximately 8 year old, male toy poodle (microchip #484 370 7F25) has a thick, yellow/tan material encasing all of the upper cheek teeth and approximately one third of the surface of each upper canine. The upper gums are moderately red and swollen and pulled slightly back from the teeth. Dental problems can be painful and can lead to further health complications. The animal listed above must be examined by a licensed veterinarian in order to ensure that an accurate diagnosis is obtained and an appropriate treatment plan is developed and followed. This must be done by November 13, 2014. This information, including diagnosis, treatment and resolution of the condition, must be documented and available to the inspector upon request.

The white, approximately 9 year old, female maltese (microchip #101 352 819) cited for dental problems under 2.40 (b) (2) on the August 18, 2014 inspection report was evaluated by a licensed veterinarian and received treatment.

Inspection and exit interview conducted with facility representative.
