Certificate: 14-R-0022

Site: 001

MASSACHUSETTS EYE & EAR INFIRMARY

Type: ROUTINE INSPECTION

Date: 16-NOV-2015

---

### 2.31(e)(3)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

The protocol involving cranial implants in non-human primates does not contain a description of routine care and maintenance of the implants. In November 2015, a monkey was diagnosed with a deep infection under a cranial implant. The infection possibly could have been prevented had the animal's implant been maintained under the direction of an IACUC approved plan for the routine care and maintenance of cranial implants. The IACUC must ensure that all proposals to conduct activity involving animals contain a complete description of the use of the animals.

Correct by December 18, 2015

An exit briefing was conducted with facility representatives on Nov 17th, the inspection was conducted on the dates of Nov 16-17th 2015.
