HAND ME DOWN ZOO
1056 Highway 211 N W
WINDER, GA 30680

Customer ID: **502959**
Certificate: **57-C-0376**
Site: 001
HAND ME DOWN ZOO

Type: ROUTINE INSPECTION
Date: 29-JAN-2024

2.75(b)(1)

Records: Dealers and exhibitors.

The disposition records are not current or complete at the time of inspection. There is no documentation available to review for the disposition of a zebra, a raccoon and three opossums that occurred since the last inspection. Accurate and complete acquisition and disposition records are necessary to allow for medical and legal tracking of the animals. The facility shall ensure that it makes, keeps, and maintains records which fully and correctly disclose the following information concerning all exhibition animals: name and address of person from whom an animal was acquired, their USDA license number or Driver's license number/state, the name and address of the disposition of the animal, the date of acquisition and/or disposition, and the species of the animal.

Corrected at time of inspection.

2.134

Contingency planning.

The facility has not yet completely developed and documented a contingency plan. A written contingency plan is required to help ensure animal health and well-being in the event of an emergency or disaster; without this tool, animals may suffer illness, injury, or death due to unpreparedness should an emergency or disaster strike. The licensee must develop, document, and follow an appropriate plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster. The plan must also be reviewed annually, and all employees trained on the plan within 30 days of employment.

Corrected at time of inspection.

3.13(b)

Veterinary care for dogs.

Medical records were incomplete for both dog hybrids. Per the licensee, "Luna" and "Kuda" were both prescribed a monthly heartworm medication but there is no medical record showing any medication was prescribed or any treatments were given. Also, "Kuda" was prescribed an ear medication on January 10, 2023, with no record of doses being given by the licensee. The licensee stated all medications had been given as prescribed. Medical recordkeeping is important for ensuring the dog hybrids receive correct and complete medical care as well as assist with monitoring. Incomplete records can lead to missed or incorrect treatments, which can cause medical conditions to worsen. The facility shall keep copies of medical records for dog hybrids that include the required information including the identifying information of the animal,

Inspection Report

all preventative and routine husbandry procedures performed, information about problems identified, the plan for treatment and care, treatments and/or vaccinations administered, and results of all tests performed.

Correct by 03/15/2024.

3.75(f)

Housing facilities, general.

There is standing water in approximately 25 percent of the outdoor portion of the lemur enclosure while the remaining area is wet and damp. Furthermore, approximately 90 percent of the heated shelter's dirt floor has standing water while the remaining area is wet and/or muddy. The last rain occurred two days prior to this inspection indicating poor drainage within this enclosure. Improper drainage systems and standing water where the animals are contained may result in noxious odors, spreading of diseases, insect infestation, and/or other health hazards. Housing facilities for non-human primates must be constructed and maintained so that waste and water are rapidly eliminated to keep the animals dry, minimize vermin and pest infestation, insects, odors, and disease hazards.

Correct by 3/15/2024.

This inspection and exit interview were conducted with a facility representative.
