Sugar and Spikes ROC
61 Glenview Lane
Rochester, NY 14609

Customer ID: **6020558**
Certificate: **21-A-0236**
Site: 001
Sugar and Spikes ROC

Type: ROUTINE INSPECTION
Date: 07-OCT-2024

3.126(b)

Facilities, indoor.

There was a very strong ammonia odor in the small animal room. The room was closed up with a ceiling fan running, and an air purifier, but these methods were not effective in facilitating air flow or minimize the odor. Ventilation for this room needs to be addressed to minimize ammonia levels and provide for the health and comfort of the animals.

Correct by: Oct 10, 2024

3.131(a)

Sanitation.

***The exercise wheels for the hedgehogs needs to be cleaned. The wheels are caked with feces all around the wheel. The licensee states she cleans the wheels weekly, but hedgehogs are known to run and defecate on wheels nightly and they should be cleaned on a more frequent basis to reduce strong odors in the small animal room and for the health of the animals.

*** The licensee feeds a gel supplemental diet to the sugar gliders on paper plates. Each of the sugar glider enclosures had multiple paper plates stacked that were dirty and need to be removed. When fresh plates are provided, the old plates should be pulled and discarded to reduce the potential for pests and to keep the enclosure clean.

Correct by: Oct 8, 2024

This inspection and exit interview were conducted with the licensee.
