Wild Animal Inc.
124 Jungle Dr
Strafford, MO 65757

Customer ID: **43052**
Certificate: **43-C-0301**

Site: 001

WILD ANIMAL INC.

Type: ROUTINE INSPECTION

Date: 27-OCT-2014

3.125(a)

FACILITIES, GENERAL.

(a) Structural strength.

***In the walk through, there was one primary enclosure that contained three Pot Bellied Pigs. There was damage to the chain link fence between these pigs and the Jacob Sheep. The fence had been repaired with pieces of 2" x 4" wire panels, yet the panels had become detached and one of these panels had sharp points on one end within the pig enclosure. There was also a board that had been wired to the bottom of the chain link fence, but was laying flat on the ground. Both of these areas left the sharp points at the bottom of the chain link fence exposed into the pig enclosure and into the sheep enclosure. Sharp edges create a potential injury for the animals within the enclosures. The licensee must repair this fence, remove the sharp points from protruding into the enclosures and assure that all enclosures are free of sharp points and edges as required.

To be corrected by November 1, 2014.

3.125(c)

FACILITIES, GENERAL.

(c) Storage.

***In the feed room there were bags of grain, scratch and pellets that had either been opened or busted and poured onto the floor in between the pallet slats. The feed in the pallets was caked and had areas of mold. The facility representative stated that they had stopped feeding the scratch. There was a dead mouse and numerous mouse traps that had been tripped. Feed waste that is not removed from storage areas attracts pests that can contaminate the feed. The licensee must clean this area and assure that all feed is adequately stored as required.

To be corrected by November 1, 2014.

3.131(c)

SANITATION.

(c) Housekeeping. Premises.

Prepared By: BEVERLY HICKS, A C I USDA, APHIS, Animal Care

Inspection Report

***In the feed storage area, the feed delivery truck had old caked, wet and molded feed in the back of the bed and under the feed container. There were flies in this area. Feed trucks that are not cleaned and are parked in the feed storage areas attracts pests that can contaminate the feed. The license must remove the old feed and assure that all areas of the premises are cleaned as required.

To be corrected by November 1, 2014.

This inspection began at 1028.

The inspection and exit conference were conducted with the facility representative.

End of report.
