3.15(a)(1)

Primary enclosures used to transport live dogs and cats.

On November 28, 2023, 30 dogs arrived at John F. Kennedy International (Queens, New York) from Ben Gurion Airport (Lod, Israel) on EL AL Israel Airlines (AWB# 11461655543).

The crate for a Saluki, "Zara," was damaged at arrival. The enclosure had a crack that spanned across the top of the enclosure and down to the left-side. The dog was safely secured by cargo facility representatives.

Primary enclosures must be strong enough to securely contain animals and to withstand the normal rigors of transportation.

This inspection and exit interview were conducted with cargo facility and airline representatives.
