

## Inspection Report

Prescott Animal Park Assn.  
1403 Heritage Park Rd.  
Prescott, AZ 86301

Customer ID: **3452**

Certificate: **86-C-0082**

Site: 001

PRESCOTT ANIMAL PARK ASSOCIATION

Type: FOCUSED INSPECTION

Date: 07-NOV-2017

### 2.40(b)(2)

#### REPEAT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Hamton, a pot-bellied pig in the domestic interactive area walked with an abnormal gait. He was slow to stand and when he did, he walked slowly around his pen. He did not walk with a smooth motion, but instead appeared to have a stiff gait and positioned both hind limbs next to each other and directly underneath him for support.

Ongoing lameness issues could cause pain and discomfort to the animal if left untreated. This animal must be evaluated by a licensed veterinarian for a proper diagnosis and to establish an effective treatment plan. The diagnosis and treatment plan must be documented in writing and available to the inspector upon request.

### 2.40(b)(3)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Hamton, a pot-bellied pig in the domestic interactive area walked with an abnormal gait. He was slow to stand and when he did, he walked slowly around his pen. He did not walk with a smooth motion, but instead appeared to have a stiff gait and positioned both hind limbs next to each other and directly underneath him for support. He was on Metacam in the past for arthritic issues, but this was stopped in March for an unknown reason and there were no other records documenting his daily lameness issues.

Failure to observe and properly communicate animal health issues to the attending veterinarian in a timely manner can result in prolonged pain and suffering for the animal and potentially worsen a current medical condition.

Daily observation of all animals is critical to ensuring that conditions that can adversely affect health and well-being are recognized in a timely manner. Additionally, when observed, problems relating to animal health or behavior must be conveyed to the attending veterinarian so that appropriate methods can be employed to ensure adequate care. The facility must conduct daily observations of all animals to ensure that all health and behavioral concerns are found in a timely manner and appropriately communicated with the attending veterinarian.

Date to be Corrected: November 10, 2017
