ANGELA BURNS & CRAIG BURNS

Type: ROUTINE INSPECTION

Date: 09-DEC-2015

2.40(b)(2) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

* There were at least 16 adult dogs at the facility that were matted and in need of grooming. Unkempt and matted hair coats can cause discomfort to the dogs and may lead to serious medical conditions. The licensee shall incorporate a proactive approach to grooming that maintains the animal's hair coats and nails and prevents them from becoming matted. TO BE CORRECTED BY: 12/11/2015

An adult female Cocker Spaniel microchip ID # 861544 was heavily matted across her body. The mats were thick and her hind legs had hard, dark brown, masses of hair and fecal material compacted around her joints.

An adult male Poodle microchip ID # 013313616 had tight, thick matting across his body and legs.

An adult female Cocker Spaniel microchip ID# 016047366 had hard, thick mats covering both ears.

An adult female Cocker Spaniel microchip ID# 035617804 had hard, thick mats covering both ears.

An adult female Cocker Spaniel microchip ID# 047366 had hard, thick mats covering both ears.

An adult female Cocker Spaniel microchip ID# 108333342 had matted hair on her legs and buttocks.

An adult male Cocker Spaniel microchip ID#0A01736716 had large, hard masses of matted hair on his ears and chest.

An adult male Cocker Spaniel microchip ID# 018634878 had matted hair on his buttocks.

An adult male Poodle microchip ID# 033832025 had hard sections of matted hair across his underside and back legs.

An adult male Poodle microchip ID# 018769316 had tight matting on his legs and sections of matted hair across his body.

An adult female Poodle microchip ID# 049331632 had sections of matted hair across her body.

An adult male Poodle microchip ID# 047881353 had thick hard sections of matted hair mixed with a brown substance on his hind legs.

An adult female Poodle microchip ID# 018777583 had tight, heavy matting across her body.

An adult male Poodle microchip ID# 049617590 had thick, tight matting across his body and legs. The dog was also thin and lacking body condition, which was hard to recognize due to the heavy matting, until palpated.

An adult female Poodle microchip ID#049617590 was heavily matted, with thick dangling mats across her body and legs.

Inspection Report

**There were 6 weaned Coton / Poodle mix puppies that had dark, dried fecal matter covering their anus and buttocks. Two of the puppies microchip # 836538328 and 836381864 were observed straining to defecate. The dried material was hardened and blocking the anus. The exposed skin surrounding the anus appeared inflamed and reddened. Abnormal bowel habits may be the indication of a serious medical condition. The licensee shall have the puppies examined by a licensed veterinarian to obtain a written diagnosis and treatment plan, follow up care should be provided as prescribed. The licensee was verbally directed during the inspection that the puppies should be examined within 48 hours. TO BE CORRECTED BY: 12/11/2015

***An adult female Cocker Spaniel microchip ID# 049352035 had thick, hard matter surrounding both eyes. The skin surrounding both eyes and her mouth appeared rough and dry. Skin conditions can be painful and can be the indication of a serious medical condition. The licensee shall have the dog examined by a licensed veterinarian to obtain a written diagnosis and treatment plan, follow up care should be provided as prescribed. The licensee was verbally directed during the inspection that the dog should be examined within 48 hours. TO BE CORRECTED BY: 12/11/15

*** There were two bottles of expired medication and an expired box of vaccinations; Panacure exp:4/2011, Sulfadiazine/Trimethoprim/Metronidazole mix exp:5/24/2015 and IntraTec3 6/27/2014. Products that have exceeded their expiration date may not retain their potency or have the desired effect intended. The licensee shall ensure that medications and vaccinations used at the facility are in date. TO BE CORRECTED BY:12/11/2015

2.78(a)

HEALTH CERTIFICATION AND IDENTIFICATION.

The licensee acquired 4 adult male Catons from North Carolina in October 2015 and transported the dogs across state lines into Missouri without health certificates. Health certificates are needed to ensure an animal is healthy and free from infectious disease. The licensee shall obtain a valid health certificate executed and issued by a licensed veterinarian prior to transporting dogs in commerce, across state lines. TO BE CORRECTE BY: 12/9/2015

3.1(c)(1)(2)

HOUSING FACILITIES, GENERAL.

At least 3 of the metal support beams of the indoor enclosures of the adult housing facility were rusted through and had open areas of sharp, jagged metal exposed at animal level. Rusted, sharp metal with jagged edges could injure the dogs. The licensee shall ensure all enclosures are free of jagged edges or sharp points that might injure the animals. TO BE CORRECTED BY: 12/11/2015

3.1(c)(1)

Inspection Report

HOUSING FACILITIES, GENERAL.

The carpet squares used to cover the flooring of the raised whelping enclosures were soiled, torn and smelled of ammonia. Adequate cleaning and proper maintenance of surfaces is a crucial aspect of animal husbandry and aids in disease prevention. The licensee shall ensure the surfaces of housing facilities are constructed in a manner and made of materials that allow them to be readily cleaned and sanitized, or that they are removed or replaced when worn or soiled. TO BE CORRECTED BY:12/11/2015

3.1(c)(3)

HOUSING FACILITIES, GENERAL.

There was a thick brown buildup along the edges and of the raised whelping enclosures. Adequate cleaning is a crucial aspect of animal husbandry and assists in disease prevention. The licensee shall ensure any surfaces that come in contact with dogs are spot-cleaned daily and sanitized in accordance with Sec. 3.11(b) of this subpart to prevent accumulation of excreta and reduce disease hazards. TO BE CORRECTED BY:12/11/2015

3.6(a)(2)(10)

PRIMARY ENCLOSURES.

The raised flooring sections of at least two of the indoor enclosures of the adult housing facility were no longer secured and had gaps that the dogs feet and legs could fit through. The animals could become entrapped or injured due to these gaps. The licensee shall ensure that the flooring of each enclosure is constructed in a manner that protects the dogs' and cats' feet and legs from injury, and that, if of mesh or slatted construction, do not allow the dogs' feet to pass through any openings in the floor. TO BE CORRECTED BY: 12/14/2015

This inspection and exit briefing was conducted with the licensee and a MoDA Animal Health Officer.
