THE WILD ANIMAL EXPERIENCE

Type: ROUTINE INSPECTION
Date: 30-JAN-2020

3.76(c)

INDOOR HOUSING FACILITIES.

*** At the time of the inspection, the lighting for the non human primates are turned on and off daily by animal care staff and these times vary. This does not provide the animals with a regular diurnal light cycle. The squirrel monkeys are showing signs of hair loss on their tails which could be due to the irregular light cycle if lights are turned on and off at different times each day. As this is an indoor building, lights should be on a time schedule which mimics a regular diurnal light cycle for the health of the animals.

Correct by: Feb 5, 2020

3.126(b)

FACILITIES, INDOOR.

*** Two juvenile exotic animals are housed in a building that does not have electricity. At the time of the inspection, the windows were closed and there was a large amount of moisture condensation on the ceiling that was dripping in the building. Inadequate ventilation in winter housing buildings can contribute to respiratory and health issues and need to be addressed through appropriate means of fans, windows or other methods to minimize odors and moisture condensation.

Correct by: Feb 10, 2020

This inspection and exit interview were conducted with the facility owner.
