Environment enhancement to promote psychological well-being.

The facility provides opportunities for bird species-specific behaviors (perches, nestboxes, foraging, flying, dust-bathing, and social housing) for different birds, however a documented plan to promote the psychological well-being of birds has not been developed at the facility and approved by the attending veterinarian (AV). A written environmental enhancement program that is approved by the AV helps ensure that birds can be provided with adequate species-appropriate socialization and enrichment. Ensure to work with the AV to develop and document an approved plan.

***Correct by 6/21/2024.

This inspection and exit interview were conducted with facility representatives.
