Type: ROUTINE INSPECTION
Date: 19-DEC-2016

2.8

NOTIFICATION OF CHANGE OF NAME, ADDRESS, CONTROL, OR OWNERSHIP OF BUSINESS.

The owner of the facility has a red kangaroo and two wallaroos at a different site 1 1/2 hours away.

A licensee shall notify the AC Regional Director by certified mail of any additional sites within 10 days of the change.

Notify the office of any site where animals are held.

2.40(a)(1) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The owner of the facility does not have a contract with an attending veterinarian. There is no written program of veterinary care with regularly scheduled visits.

Each exhibitor shall employ an attending veterinarian. In the case of a part-time veterinarian, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the exhibitor.

A contract with a veterinarian must be acquired. A written program of veterinary care must be developed to ensure that routine veterinary care is being followed by the owner. The program of veterinary care must be updated annually and at any time there are additional species added to the facility. This is to ensure that all animals kept at the facility are maintained in good health.

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

When the licensee stated he had the red kangaroo and 2 wallaroos at a different site, I asked when he went to care for them. The licensee stated he sometimes goes every other day.

Daily observations must be made of all animals to assess their health and well-being.

Inspection Report

Animals at all sites must be seen daily to make sure they are in good health.

3.81

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

There is no program for environmental enhancement approved by an attending veterinarian.

All exhibitors must develop, document, and follow an appropriate plan for environmental enhancement adequate to promote the psychological well-being of nonhuman primates. The plan must be in accordance with the currently accepted professional standards as cited in appropriate professional journals or reference guides, and as directed by the attending veterinarian.

Develop a program for enrichment for the non-human primates held at the facility. All enrichment must be documented by the facility and the plan must be approved by the attending veterinarian.

3.84(b)(2) REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The primary enclosures for the ring-tailed lemurs and vervets are made of wood and rusted wire. Rusted metal and wood are not impervious to moisture and therefore cannot be sanitized.

Indoor primary enclosures must be sanitized at least once every 2 weeks and as often as necessary to prevent an excessive accumulation of dirt, debris, waste, food waste, excreta, or disease hazard.

Replace the wire with new wire and replace or seal the wood so that it can be sanitized a minimum of once every two weeks for the health of the non-human primates.

3.125(a) REPEAT

FACILITIES, GENERAL.

One of the shelters for the camels is made of metal and corrugated plastic this shelter has several holes in it that have sharp points.

Outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury.

Replace or repair these shelters to protect the animals from injury.

Inspection Report

3.127(b) REPEAT

FACILITIES, OUTDOOR.

One of the shelters for the camels has a holes in it. There is a small group of goats separated from the rest of the farm animals. This small group of goats has a shelter with soiled, frozen bedding inside. There are two adult and one juvenile Cape/African Crested porcupines housed outdoors with one Igloo shelter with no bedding in it.

Shelter appropriate to the local climatic conditions for the species concerned shall be provided for all animals kept outdoors to afford them protection and to prevent discomfort to such animals. A sufficient amount of clean, dry, bedding shall be in each enclosure to create a barrier between the animal and the cold ground.

Temperatures have dipped below zero in Michigan. Appropriate shelter for the climactic condition in Michigan must be provided for all animals to give them protection from the elements and prevent discomfort. Bedding shall be sufficient, clean and dry to provide insulation from the cold ground.

3.127(d) REPEAT

FACILITIES, OUTDOOR.

There is no perimeter fence for the camels.

All outdoor housing facilities (i.e., facilities not entirely indoors) must be enclosed by a perimeter fence that is of sufficient height to keep animals and unauthorized persons out. The fence must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

A perimeter fence must be constructed or a perimeter fence variance must be requested.

This inspection was conducted on December 19, 2016 with the owner and manager of the facility, Dr. Kurt Hammel, VMO and Carrie Bongard ACI. The exit was conducted on January 3, 2017 with the owner and manager and Carrie Bongard, ACI. The inspection report was sent by certified mail because ACIS was down. The owner and manager were notified that the inspection would be sent by certified mail.

NO REGULATED ACTIVITIES MAY BE CONDUCTED UNTIL A VALID USDA LICENSE IS OBTAINED.
