WILDLIFE ENCOUNTERS L L C

Type: ROUTINE INSPECTION

Date: 14-FEB-2025

3.125(a)

Facilities, general.

An irregularly shaped @5x3.5 inch hole was present in the wood around the door of the cavy and wallaby shelter. The hole may present an entrance for rodent pests that may carry disease or contaminate feed. The facility must ensure that the enclosure is maintained in good repair.

Correct by 28 February 2025

3.128

Space requirements.

The African crested porcupine is being kept overnight inside in a travel crate, which does not allow for normal ambulation or stretching, although during daylight hours, the animal is housed in an outside exercise yard. Lack of adequate space for overnight housing may lead to abnormal behavior and debilitation. The facility must ensure that the overnight housing gives the animal enough space for adequate freedom of movement.

Correct by February 25, 2025.

This inspection and exit interview were conducted with the facility representative.
