Type: ROUTINE INSPECTION
Date: 08-AUG-2022

2.75(b)(1)

Records: Dealers and exhibitors.

A current record of guinea pigs was not available for review during this inspection. Approximately 410 adult guinea pigs, weanlings, and newborns were counted during this inspection. There were no inventory records maintained for this calendar year. Failure to maintain these records can make it difficult to assess the health of the caviary by identifying animal losses by decreased number of guinea pigs born, raised, or died. The licensee must maintain records containing the required information for animals which disclose the number of guinea pigs held, owned, acquired or disposed of including births and deaths. Correct by August 15, 2022.

3.25(d)

Facilities, general.

Waste disposal. The PVC drainage pipes for the the watering system were detached or leaking allowing waste water, dirt, and debris to collect between the animal racks and on the floor of the animal room. The wet and dirty debris pooling between the animal racks and floor can result in attracting insect pests, odors, and unsanitary conditions. Drainage systems must be operated to minimize pests, odors, and disease hazards. Correct by repairing or replacing the drainage pipes to prevent waste water and debris from collecting below the animal racks and floor of the animal room. Correct by August 19, 2022.

Inspection Report

Sanitation.

Housekeeping. There were accumulations of hay, shavings, and feed covering the floor of the guinea pig room.

Accumulations of cobwebs, dust, debris were adhering to the outside surfaces of animal enclosures, racks, walls, ceiling, drainage pipes, walls, and supports.

Animal facilities must be kept clean to ensure good quality of the air for animals and to prevent unnecessary disease risks. Correct by ensuring premises are kept clean, including: removing accumulations of hay, spilled feed, shavings, cobwebs, dust, and debris from the floor, animal enclosures, drainage pipes, walls, ceiling, and supports; routinely dusting off and cleaning surfaces; and maintaining a level of general cleanliness to support good animal husbandry and health. Correct by August 10, 2022.

This inspection and exit interview were conducted with the licensee.
