Type: FOCUSED INSPECTION
Date: 24-AUG-2017

2.40(b)(2) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A black and white female goat in the petting zoo area was observed to have what appeared to be an abnormal growth coming from the rectum area causing swelling, discoloration, and a wet buildup around the rectum. Several goats and two pigs in the petting zoo area, a zebu and several aoudad all had an excessive hoof growth. The attending veterinarian has not begun a treatment plan to address the hoof growth. Adequate daily observation followed by veterinary care is essential to ensure the health and well being of the animals.

2.40(b)(2) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Two adult pigs in the petting zoo area had to be coaxed by an employee to stand. They were both very vocal and appeared to have difficulty standing. Both limped and appeared to have trouble moving around. Both pigs were observed to have excessive hoof growth. Without proper veterinary care there is a risk of further health deterioration. The animals must be assessed by a veterinarian and any treatment plan created must be followed.

2.131(c)(1)

HANDLING OF ANIMALS.

No attendants and/or no or inadequate barriers were present in the following areas in which the public could have access to animals: Kangaroo, giraffe, muntjac, wallaby, watusi, cavy, cow. With out an adequate number of employees, there is a significant health and safety risk for both the animals and public. The licensee must ensure that areas with public access be attended by an adequate number of knowledgeable employees or have adequate barriers to ensure that the animals remain secured and unmolested in their enclosures.

Correct by 09/07/2017

2.131(d)(2)

HANDLING OF ANIMALS.

Inspection Report

Three members of the public were observed feeding and touching goats inside the petting zoo area in which there was no identifiable attendant present. With out an adequate number of employees, there is a significant health and safety risk for both the animals and public. The licensee must ensure that areas with public access be attended by an adequate number of knowledgeable employees or have adequate barriers to ensure that the animals remain secured and unmolested in their enclosures.

Correct by 09/07/2017

3.130 REPEAT

WATERING.

The following areas contained watering receptacles that were discolored, and contained green, organic material inside: Petting zoo area, cavy, rhino, Jacobs four horned sheep.

Animals are susceptible to parasites and can become ill from contaminated or unclean water. Animals must be provided clean fresh water in sanitized receptacles.

3.132 REPEAT

EMPLOYEES.

Based on the number of noncompliances and animals observed with health abnormalities, the facility does not have an adequate number of trained and knowledgeable employees to conduct adequate husbandry practices. Without an adequate number of employees, the facility can fall into disrepair, animals with health problems may go unnoticed and there is a health and safety risk to the public. The licensee must gain a sufficient number of adequately trained employees, supervised by a person or persons with a background in animal care.

This was a focused inspection to observe animals in the public access area, and animals with prior annotated health abnormalities.

This inspection and exit interview were conducted with the owner.
