

## Inspection Report

City Of Clay Center  
Post Office Box 37  
Clay Center, KS 67432

Customer ID: **4099**  
Certificate: **48-C-0017**  
Site: 001  
City of Clay Center

Type: FOCUSED INSPECTION  
Date: 05-FEB-2020

### 3.77(a)

#### SHELTERED HOUSING FACILITIES.

The ambient temperature according to the inspector's Kestrel thermometer in the indoor portion of the Japanese Snow Macaque enclosure was measured at 34.9 degrees F. The outdoor temperature at the conclusion of the inspection was 26 degrees F and the low temperature reported over night on weather.gov for this zip code was reported as 24 degrees F. This problem appears to be a result of the keeper door being left open and the heater in this area not working properly for an unknown period of time. Because the zoo employees had not noticed the malfunctioning heater today as of the time of inspection (about 11am), the temperature in this area was below 45 degrees for at least 4 hours. Failure to maintain the temperature in the sheltered building housing nonhuman primates can result in animals who are unable to maintain a safe body temperature. The licensee must ensure that the sheltered part of sheltered housing facilities must be sufficiently heated and cooled when necessary to protect the nonhuman primates from temperature extremes, and to provide for their health and well-being. The ambient temperature in the sheltered part of the facility must not fall below 45 degrees F for more than 4 consecutive hours when nonhuman primates are present, To be corrected by close of business on 5 Feb 2020.

This inspection and exit interview were conducted with facility representatives.

#### Additional Inspectors

Lundy Kendall, Animal Care Inspector

Prepared By: SHAVER MARGARET, D V M USDA, APHIS, Animal Care

Date:
