Type: ROUTINE INSPECTION  
Date: 12-JUN-2016

### 2.126(a)(2)

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

The licensee did not have the Animal Inventory and Program of Veterinary Care available for review at the time of inspection. Lack of records does not allow APHIS Officials to track animals as necessary or to review the Program of Veterinary Care as required. Ensure copies of all required records are available during inspections. Correct form this time forward.

### 3.127(a)

#### FACILITIES, OUTDOOR.

During the inspection that occurred at approximately 1:30 pm the petting zoo was located under direct sunlight. Only one shade structure was available for use by the farm type animals, which included 5 sheep, 9 goats, 1 alpaca, 1 calf and 1 llama. This shade structure was not large enough for all of these farm type animals and the other animals being exhibited to protect them from direct sunlight. Lack of sufficient shade can cause overheating and discomfort of the animals and affect their wellbeing. Provide sufficient shade to protect all of the animals being exhibited from direct sunlight. Correct immediately.

Note: The licensee corrected this noncompliance by providing additional shade for all of the animals at the time of inspection.

Inspection conducted at Good Neighbor Days in Hugo, MN.

Inspection and exit briefing conducted with President and this Veterinary Medical Officer.

End of report.
