Site: 001

PUEBLO ZOOLOGICAL SOCIETY

Type: ROUTINE INSPECTION

Date: 11-APR-2018

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A one week old Sichuan takin was observed by the APHIS Inspectors to be limping on its right foreleg. The animal was seen running and bearing weight on the leg prior to observing the limp. This condition had not been previously noticed by the facility staff. The animal's condition could indicate an injury, or other veterinary medical condition which could be painful.

The animal needs to be evaluated by a veterinarian to properly diagnose and provide a plan for treating and/or monitoring the condition.

To be corrected by: April 12, 2018

3.80(a)(2)(i)

PRIMARY ENCLOSURES.

In the Rain forest Building the back holding area for the 2 cotton-top tamarins has a wire holding the door that has sharp points protruding towards the animals. The animals could potentially come into contact with and injure themselves on these sharp points.

Ensure that the primary enclosure has no sharp points or edges that could injure the nonhuman primates.

To be corrected by: April 12, 2018

3.125(a) REPEAT

FACILITIES, GENERAL.

The outdoor enclosure housing 4 Bison and 2 Elk has a chain link fence wrapped around the tree. The chain link fence has sharp points at the bottom that the animals could potentially come into contact with and injure themselves.

Inside the shelter for the miniature donkey the wood has been chewed leaving multiple area where spikes have

Inspection Report

formed in the wall. These spikes have sharp edges and an animal could potentially come into contact with and injure themselves.

Indoor and outdoor housing facilities shall be structurally sound and maintained in good repair to protect and contain the animals.

3.127(c)

FACILITIES, OUTDOOR.

There is standing water and an excess amount of mud around the automatic water receptacle in the outdoor enclosure containing 2 adult pigs. The animals were unable to drink from the receptacle without standing in the mud. Standing water could potentially pose a health risk to the animals as it can contain bacteria and parasites.

A suitable method must be provided to eliminate muddy conditions and standing water in this area.

To be corrected by: June 12, 2018

This inspection and exit briefing were conducted with the Executive Director and General Curator.
