DEIRDRE WOLF

Type: ROUTINE INSPECTION
Date: 19-APR-2016

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An adult male golden retriever mix named "Sunshine" has a matted hair coat. Approximately 25% of the hair coat is matted, with the mats located behind all four legs. The mats vary in size from 2 to 6 inches in width and are pulling tight against the skin on the legs. Some of the mats under the tail contain dry fecal material and small gray debris. Matting can be painful and can lead to skin disease and other medical conditions. A program of routine hair coat maintenance must be established and maintained for all dogs at this facility in order to prevent diseases associated with excessive matting. To be corrected by: April 29, 2016.

Inspection and exit briefing conducted with facility representative.
