Site: 001

ANDREAS GEORGIADES

Type: ROUTINE INSPECTION

Date: 15-SEP-2015

3.56(a)

SANITATION.

Straw and hay are tangled into the excessive amounts of cob webs on the walls of the rabbit enclosure. The enclosure, containing four rabbits, has wire walls. The majority of the walls, from the top to the bottom, are covered. Cobwebs and other debris are a potential hazard to the animals.

Clean/sanitize the rabbit enclosure and repeat often enough to prevent build up.

To be corrected: 9-18-15

3.131(a)

SANITATION.

Excessive feces and urine are present in the indoor stall that houses the goats, sheep, and llama. The animals have access into a large outdoor pasture, however; they do not have a clean, dry place to lay down while inside of the barn. Feces and urine can serve as a reservoir for disease hazards.

Assure that the animals have a clean indoor stall to promote animal health.

To be corrected: 9-17-15

The inspection exit briefing was conducted with the facility owner.
