Type: ROUTINE INSPECTION
Date: 18-SEP-2023

2.75(b)(1)

Records: Dealers and exhibitors.

The licensee has one male chinchilla. At the time of inspection, the chinchilla was not on site. The licensee stated that the chinchilla was temporarily visiting a friend's home. The licensee did not have any disposition records demonstrating the temporary removal of the chinchilla. Acquisition and disposition records are necessary to be able to accurately track animals being used in regulated activities to ensure their legal acquisition, proper care, humane transportation, and to be able to track and trace animals in the case of an animal disease outbreak. The exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose information concerning animals purchased or otherwise acquired, owned, held, leased, or otherwise in his possession or under his control, or which is transported, sold, euthanized, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his possession or under his control. All information found within section 2.75(b)(1) should be recorded, maintained, and made available for inspection.

To be corrected from this day forward

3.53(a)(2)

Primary enclosures.

The licensee had two rabbits in an enclosure lined with mulch. The mulch was excessively wet and dark in color with a layer of liquid present. The rabbits' feet and hindquarters were wet and stained. Failure to maintain an enclosure that keeps the animals dry and clean can lead to unnecessary discomfort and possible disease. All primary enclosures for rabbits shall be constructed and maintained so as to enable the rabbits to remain dry and clean.

To be corrected from this day forward

3.80(a)(2)(iii)

Primary enclosures.

On September 3rd, 2023 between the hours of 4-7:30pm, the licensee's spider monkey escaped from his indoor primary enclosure and the facility in which the primary enclosure was located. The animal was loose in the community for approximately 24 hours, before being captured at approximately 7pm on September 4th, 2023. Failure to have a primary enclosure which adequately contains the animal can lead unnecessary harm to the animal and the public. Primary enclosures for nonhuman primates must be constructed and maintained so that they contain the nonhuman primates

3.154

Environment enhancement to promote psychological well-being.

The facility has a singly housed blue-and-gold macaw. The licensee does not have an environmental enrichment program for this bird. Failure to develop and document an environmental enrichment program for birds can negatively impact their health and well-being, causing unnecessary psychological distress. Exhibitors must develop, document, and follow a species-appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must be in accordance with the regulations in subpart G and with currently accepted professional standards as cited in appropriate professional journals and reference guides. This plan must be made available to APHIS upon request. The plan must address each category listed in 3.154.
To be corrected by 9/18/2023

This inspection and exit interview were conducted with the licensee.
