Type: ROUTINE INSPECTION
Date: 12-DEC-2017

2.75(b)(1) REPEAT

RECORDS: DEALERS AND EXHIBITORS.

A current record of guinea pigs on hand was not available for review during this inspection. A total of 511 adult guinea pigs and weanlings were counted during this inspection. There were no inventory records indicating the number of adults, weanlings, or newborns present since the last inspection report dated August 10, 2017. Records are required to adequately verify the total number of animals housed at the facility and for evaluating the facility animal care program. Correct by ensuring there are current records of animal totals, including the number of adults, weanlings, and newborns are maintained and available for review for guinea pigs housed at the facility. In addition, deaths must be recorded and maintained.

3.31(a)(1)

SANITATION.

There are accumulations of wet and soiled bedding on the floor of enclosures under the hay especially near the automatic PVC water pipe. According to the licensee, the bedding is being removed every 2 weeks. These accumulations on the floor of enclosures exposes the guinea pigs to potential infections with bacteria, fungi, and parasite. Correct by ensuring that all primary enclosures are cleaned and sanitized often enough to prevent accumulations of excreta, wet, and soiled bedding and that enclosures are sanitized at least once every 2 weeks. Correct by December 13, 2017.

This inspection and exit interview were conducted with the owner.
