Site: 001

THE HIGH DESERT MUSEUM

Type: ROUTINE INSPECTION

Date: 15-NOV-2018

3.126(d)

FACILITIES, INDOOR.

The otter exhibit has a drainage problem that requires daily flushing of the drain in order to properly clean the enclosure. A strong odor is readily detectable upon entering the underwater viewing area of the otter exhibit. This drainage problem needs to be repaired to eliminate foul odors and the eventual back up of drainage waste into the otter exhibit. A regular program of facility maintenance needs to be in place to ensure the proper functioning of all facility components.

Correct by: A soon as possible and no later than 12/31/2018

Prepared By: LECROY TOM, A C I USDA, APHIS, Animal Care
