151 Kapahulu Avenue
Honolulu, HI 96815

Customer ID: **3395**

Certificate: **95-C-0049**

Site: 001

CITY AND COUNTY OF
HONOLULU

Type: ROUTINE INSPECTION

Date: 03-JUN-2024

3.75(c)(2)

Housing facilities, general.

In the Siamang enclosure, there was a wooden plank bridge with areas of heavy wearing and some cracks and rough ridges along the top surface. Also, an approximately one foot long and two-inch-wide section of the bridge had broken off a few months ago leaving porous wood exposed. Surfaces which cannot be readily cleaned and sanitized such as porous or unsealed, cracked surfaces can trap debris, bacteria, or other harmful organisms. All surfaces must be maintained on a regular basis. Surfaces of housing facilities that cannot be readily cleaned or sanitized must be replaced when worn or soiled.

Correct by 06/25/2024.

3.84(c)

Cleaning, sanitization, housekeeping, and pest control.

The chimpanzee kitchen used for food preparation, food/supply storage, and for cleaning animal dishes is in need of general housekeeping and cleaning. There were several cobwebs in the room including some approximately 1ft X 1ft in size along the walls, and some underneath light fixture shelving which was directly above the sink and food/water receptacles. Additionally, these two shelves were in need of repair. The side panels of the shelves were made of wood material which is worn away and deteriorating in areas allowing small pieces of the panel to easily flake off. These shelves also contained some rough, gritty surface areas of dark, reddish-brown rust along the tops and front facing edges. Regular cleaning, housekeeping and facility maintenance are necessary to protect the health of animals, to prevent the harborage of pests and to reduce the potential for spread of disease. Premises where housing facilities are located including buildings and grounds must be kept clean and in good repair in order to protect the nonhuman primates from injury, to facilitate the husbandry practices set forth in this subpart and to reduce the breeding or living areas for rodents, pests or vermin.

Correct by 06/18/2024.

This inspection and exit interview were conducted with facility representatives.
