Type: ROUTINE INSPECTION
Date: 08-FEB-2024

3.25(a) Repeat

Facilities, general.

During the inspection, one guinea pig was observed to be out of its enclosure and running around on the floor of the building.
Guinea pigs that have escaped their enclosure could be at risk of injury or escape from the barn as well as the inability to access food and water.
The licensee must ensure that the enclosure contains the animals at all times and does not allow them to escape.
Housing facilities must be adequate to protect the animals from injury and to contain the animals.

3.31(a)(1)

Sanitation.

Approximately 10 out of 100 guinea pig enclosures had portions of the pens that were mats of solid fecal material with no clean bedding available. There were approximately 5 pens that contained a large amount of soiled, wet bedding especially in the areas of the automatic waterers.
The accumulation of feces and unclean enclosures can cause unpleasant odors, lead to contamination of the enclosure, and attract pests and vermin that carry diseases that result in risks to the health of the animals.
Enclosures must be cleaned and sanitized as often as necessary to prevent a build-up of debris and fecal material and sanitized at a minimum of once every two weeks.
Correct by: February 22, 2024

This inspection and exit interview were conducted with the licensee.
