FACILITIES, OUTDOOR.

One approximately 7 month old tiger is being housed in a chain-link enclosure that has a top on it. Part of the top is covered with a fiberglass roof. The enclosure is surrounded by a privacy/perimeter fence that has large trees around it. To protect the animal from excessive wind/rain, a wind/rain block needs to be added to the sides of the enclosure that face the prevailing winds. Adding this protection prevents any potential discomfort for the animal, but should still allow adequate airflow.

Correct by: July 8, 2014

Inspection and exit interview conducted with Licensee.
