COLUMBIA STATE COMMUNITY
COLLEGE

Type: ROUTINE INSPECTION

Date: 07-NOV-2023

2.31(c)(1)

Institutional Animal Care and Use Committee (IACUC).

Based on semi-annual checklists and the semi-annual evaluation letter to the Institutional Official the facility has been conducting a semi-annual facility inspection of the animals and animal areas but has not been conducting a complete program review. The facility is using review of the approved protocols as their program review according to the semi-annual evaluation report. The checklists covering the program review topics found in the IACUC records are not marked as reviewed/completed. The IACUC must complete a review of the facility's program for humane care and use of animals using the Animal Welfare Act and Regulations to help ensure that the IACUC and the facility are following all research regulations covered by the Animal Welfare Act and Regulations.

The facility shall review, at least once every six months, the research facility's program for humane care and use of animals, using title 9, chapter I, subchapter A--Animal Welfare. Correct by May 1, 2024.

2.31(d)(4)

Institutional Animal Care and Use Committee (IACUC).

The IACUC did not notify the principal investigator (PI) in writing of its decision to approve or disapprove of the protocols related to the regulated species being used for teaching vet tech students (protocols EH, ER, GH and RH). This written notification is necessary for the PI to know when the protocols are approved and when the animals can be used. Correct by the IACUC providing written notification to the PI of decisions made regarding the review of proposed activities by November 30, 2023.

2.38(l)(2)

Miscellaneous.

At the time of inspection, there was no written documentation that an annual review was completed of the contingency plan. Annual reviews of the contingency plan help ensure that identified emergency situations and measures are adequately addressed for the humane handling, treatment, transportation, housing and care of animals in the event of an emergency. The plan must be reviewed and documented by the research facility on at least an annual basis to ensure it adequately addresses the regulatory requirements of contingency planning.

Correct by reviewing the contingency plan and documenting the review by November 30, 2023.
