IN THE COMPANY OF WOLVES

Type: ROUTINE INSPECTION  
Date: 18-JAN-2017

### 3.127(d)

#### FACILITIES, OUTDOOR.

The perimeter fence currently surrounding the 11-month old bear's closed-top enclosure is 5 feet in height. All outdoor housing facilities for potentially dangerous animals including bears must be surrounded by a perimeter fence at least 8 feet in height. Additionally, it must be at least 3 feet in distance from the primary enclosure. These requirements of a perimeter fence are necessary to help ensure that unauthorized persons or animals cannot access the facility, to prevent physical contact between animals inside the primary enclosure and animals or persons outside the perimeter fence, and to effectively function as a secondary containment system in case of animal escape. Perimeter fences less than 8 feet in height or less than 3 feet in distance from the primary enclosure for potentially dangerous animals such as bears must be approved in writing by the Administrator.

A perimeter fence surrounding the bear enclosure must be constructed to achieve 8 feet in height and must be at least 3 feet from the bear's primary enclosure or approval must be obtained.

Correct by 05/01/2017.

### 3.131(c)

#### SANITATION.

Food storage/supplies room: There is a general accumulation of clutter in this room with several miscellaneous animal supplies, including food, bedding and other animal items stored in an untidy and unorganized manner. Additionally, on top of an animal use refrigerator was a heavy accumulation of dust and several insecticide/pesticide products stored and intermingled with animal medications. Inappropriate storage of potentially toxic or hazardous products may result in the unintentional contamination of animal items.

Premises including buildings, surrounding grounds and other animal areas must be kept clean, free of clutter and in good repair in order to protect the health and well-being of the animals, to prevent the harborage of vermin and pests, and to facilitate the prescribed husbandry practices. A system of maintaining effective housekeeping practices must be in place.
