Certificate: **23-A-0513**
Site: 001
AMOS KAUFFMAN

Type: ROUTINE INSPECTION
Date: 25-OCT-2016

3.28(a)(1)

PRIMARY ENCLOSURES.

While some enclosures were constructed of plastic and others of painted plywood, two enclosures had fronts made of pressboard (OSB). Moisture had penetrated the OSB on these two enclosures and, on one of the enclosures, had caused deterioration to the point that it was no longer structurally sound. Moisture penetrating the surface can lead to disease in the animals and loss of structure that might lead to injury. Correct by assuring primary enclosures are structurally sound and maintained in good repair to protect the guinea pigs and are constructed of smooth material substantially impervious to liquids and moisture. Correct by: 1 December 2016

This inspection and exit interview were conducted with the owner's spouse.
