Denver Rescue Mission Harvest Farm

Type: ROUTINE INSPECTION

Date: 27-OCT-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***The Program of Veterinary Care on file is incomplete. An adult, female Great Pyrenees, used for exhibition, was not included on the Program of Veterinary Care (PVC). There was no mention of preventative care practices for dogs, and the species itself was not listed on the PVC.

The PVC is a written agreement between the exhibitor and the attending veterinarian establishing standards of care for the animals. Failure to have a complete PVC could jeopardize the health and well-being of the animals. The facility should establish and maintain a PVC to include all the regulated animals at the facility and regularly scheduled visits to the premises.

To be corrected by: November 10, 2017

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***An adult white rabbit with black ears had a large swelling on the right side of the face, just above the nose. The skin around the swelling was reddened. The right nostril was inflamed and larger when compared with the left. Beneath the swelling and near the right nostril, there was a crusted area of dried blood. A yellow discharge was on the fur underneath both the left and right nostrils. Facility staff had not identified this animal's condition prior to the APHIS inspector noticing it.

The presence of swelling, inflammation, and blood are an indication of disease or injury and often pain. It can result from numerous causes including both infectious and non-infectious. Failure to contact the attending veterinarian regarding the diagnosis and treatment can result in delays of appropriate care and prolong suffering of the animal.

Failure to observe and properly communicate animal health issues to the attending veterinarian in a timely manner can result in prolonged pain and suffering for the animal and potentially worsen a current medical condition. Daily observation of all animals is critical to ensuring that conditions that can adversely affect health and well-being are recognized in a timely manner. Additionally, when observed, problems relating to animal health or behavior must be

conveyed to the attending veterinarian so that appropriate methods can be employed to ensure adequate care. The facility must conduct daily observations of all animals to ensure that all health and behavioral concerns are found in a timely manner and appropriately communicated with the attending veterinarian.

To be corrected from this date forward.

3.4(b)

OUTDOOR HOUSING FACILITIES.

***At the time of inspection, the facility was exhibiting an adult, female Great Pyrenees in an outdoor enclosure without a shelter structure.

Without access to a shelter, dogs housed outdoors do not have protection from adverse weather conditions. The facility must ensure all outdoor facilities for dogs has one or more shelter structures that are accessible to each animal. Additionally, the shelter structures must be large enough to allow each animal in the shelter structure to sit, stand, and lie in a normal manner, and to turn about freely.

To be corrected by: November 3, 2017

This report is a continuation of the previous report issued on October 27, 2017 and contains the indirect citations from the routine inspection conducted at that time. An additional report containing the direct citations was previously delivered to the licensee on October 27, 2017 and an exit interview was conducted at that time. With respect to the noncompliant items contained within this report, an exit was conducted on October 27, 2017 with the licensee and the undersigned inspector.
