Okeechobee, FL 34972

Customer ID: **327114**
Certificate: **58-C-1029**
Site: 001
RODGER CLYNE

Type: ROUTINE INSPECTION
Date: 25-JUL-2023

2.126(a) Repeat

Access and inspection of records and property; submission of itineraries.

At the time of inspection an updated program of veterinary care, record of animals on hand, environmental enhancement program for non-human primates, and record of acquisition for the ring-tailed lemur was still not available for review by the inspector. The review of records required by the Animal Welfare Act facilitates the inspection process by allowing the inspector to determine compliance and evaluate animal welfare. The facility shall ensure that the records required to be kept by the Animal Welfare Act and the regulations are available for USDA APHIS officials to examine.

3.127(d) Repeat

Facilities, outdoor.

The facility which houses kangaroos, capybaras, sloths, and other exotic animals in outdoor enclosures, still does not have an adequate perimeter fence. Most of the premises is surrounded by a perimeter fence that is less than 6 feet tall. A perimeter fence protects animals from contact with unauthorized people and animals. A perimeter fence also acts as a secondary containment system if an animal escapes from its primary enclosure. Correct by installing a perimeter fence that is of sufficient height to keep animals and unauthorized persons out, and to act as a secondary containment system for animals in the facility. Alternatively, a variance may be requested in writing from the APHIS Administrator.

This inspection and exit interview were conducted with a facility representative.
