Type: ROUTINE INSPECTION
Date: 25-FEB-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

There were three Pomeranians with matted hair and feces hanging from the back of their legs. A brown and white female id# 0A02515552, a white female id # 0A02515831 and a brown male id#0A02514836. Matted hair on the dog can cause discomfort & could lead to infection or health problems for that dog. Mobility of the dog could also be affected with the discomfort or pain associated with matted hair constantly pulling on the skin of the dog. The potential for the skin to become inflamed or infected exists with continued scratching. Matted hair does not maintain the same insulating qualities of normally groomed hair. Regular grooming of matted hair is necessary to ensure the health & well being of all dogs.

Inside the whelping building, there was a container of outdated Pyrantel Pamoate expiration date October 2012. This medication was intermingled with other products that are currently being used at the facility and are therefore ready for use. The usage of expired medical materials on regulated animals is not considered to be an acceptable veterinary practice and does not constitute adequate veterinary care. The effectiveness of the dosage level and expected results when expired drugs are administrated could be drastically changed or may not work as anticipated.

The licensee must ensure that all medications used have not gone past the recorded expiration date. To be corrected by 02-28-2015

3.11(d)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

Inside the whelping building, rodent droppings were present on the floor around buckets and next to the wall. When inspectors entered the building an odor associated with rodents was present. Licensee advised they were not using any rodent prevention methods at the facility. Rodents and other vermin can spread disease and other health hazards that could adversely affect the health and well-being of the dogs. Owner must implement a program of pest and vermin control to protect the all the dogs throughout the facility. To be corrected by 03-25-2015
