Site: 002

Boston, MA 02115

NEW ENGLAND REGIONAL PRIMATE CENTER

Type: ROUTINE INSPECTION

Date: 10-MAR-2014

2.38(f)(1)

MISCELLANEOUS.

Handling.

A Marmoset sustained a fractured tibia and fibula 12/18/12 during a sedation procedure that was part of an IACUC approved research activity. The injury to the NHP's leg was immediately recognized by research personnel and the clinical veterinary staff was contacted. The condition of the NHP was assessed and appropriate treatment and analgesics were administered. The NHP made a full recovery.

Per this Section of the Regulations, animals should be handled as expeditiously as possible in a manner that does not cause trauma, behavioral stress, physical harm, or unnecessary discomfort to ensure the health and well-being of the animal.

In response to this incident and to prevent any future incidents, the institution took corrective actions including but not limited to review and revision of the Handling SOP, changes to husbandry practices, and providing additional training to personnel on the revised SOP. There have not been any additional incidents since the corrective actions were implemented.

The institution has taken appropriate corrective measures to address this item.

NOTE - This was a focused inspection of IACUC records and documents conducted 3/10/14 and 3/11/14. Exit interview held 3/11/14 at Site 001 with facility representatives.
