2.50(c)

TIME AND METHOD OF IDENTIFICATION.

Several dogs including 3 dams with litters in the same primary enclosures had no means of identification on the dog's cage or run or in animal record books kept at this facility. Failure to properly identify all animals as required by 9CFR section 2.50 inhibits the accurate tracking and verification of animals at this facility. A system of proper animal identification using a method allowable by the USDA must be in place.

2.75(a)(1)

RECORDS: DEALERS AND EXHIBITORS.

APHIS Form 7005, Record of Acquisition and Dogs and Cats on Hand, was not being used correctly. Animal identification number, birthdate, and acquisition information fields were not annotated for all animals. This form must be used to maintain a listing of the dogs on hand as well as the acquisition information concerning the dogs. The acquisition information must include the date the animal was acquired as well as information concerning the person the animal was acquired from - name, complete mailing address, USDA license number (if applicable), driver's license number, and vehicle license number. This form must be updated continuously.

3.1(c)

HOUSING FACILITIES, GENERAL.

- The interior and exterior runs of the sheltered building have concrete floors that have not been sealed. The floor surfaces are porous and cannot be cleaned and sanitized as required. Fecal material and other debris can accumulate in small crevices increasing the potential of disease hazards in these areas.
- There are wooden-framed access doors in between the interior and exterior runs of the sheltered building which contained unsealed, raw wood.
