Site: 001
SAFARI BOBS LLC

Type: ROUTINE INSPECTION
Date: 21-MAY-2024

2.131(b)(1) Critical

Handling of animals.

Prior to the inspection, the licensee determined that an adult armadillo was missing from its enclosure. The licensee stated that the armadillo was never recovered, and the exact cause of its disappearance was never determined. On December 8, 2023, the licensee reported the theft of the adult armadillo from its primary enclosure with the local sheriff's office. However, the cause of the disappearance remains unknown. Animals that have disappeared from their enclosure, whether stolen, escaped, or missing from some other cause, can become severely injured or distressed, adversely affecting their health and well-being. The current handling measures you have in place were insufficient to prevent the loss of the armadillo. Handling of animals shall be done as expeditiously and carefully as possible in a manner that does not cause trauma or physical harm, as these are serious consequences of an animal's disappearance or escape.

Corrected prior to inspection.

2.131(c)(1)

Handling of animals.

The facility allows the public to handle lemurs in a manner that presents a significant risk of harm to the animal and public. The licensee stated that during public interactions, the lemurs are allowed to sit on the heads and shoulders of guests and come into close contact with their faces and mouths. Improper handling of non-human primates could expose both animals and humans to diseases, which could lead to severe injury, illness, and even death. Any animal must be handled so there is minimal risk of harm to the animal and public, with sufficient distance and/or barriers between the animal and the general viewing public to assure safety of animals and the public.

To be corrected from this day forward of May 21, 2024.

This inspection and exit interview were conducted with the licensee.
